Product Overview

Connect with your customers and staff directly via SMS from email with redcoal's fully integrated Microsoft SMS Outlook 2007 client.

Simply sign up for a free trial set your preferences and get texting today.

Benefits of MS Outlook™ 2007 SMS

Australian firms are increasingly realising the advantages SMS affords over traditional methods of communicating with internal and external stakeholders.

- Reduced communication costs allow savings to be channeled elsewhere.
- Automating routine tasks, improving productivity and allowing your staff to concentrate on what they do best.
- Quicker response times lead to increased customer satisfaction and customer service levels.
- Positive feedback from businesses already taking advantage of SMS can be attributed to the less intrusive nature of the medium.
- Zero training requirements ensure quick user adoption.

Product Features

- **Two Way Messaging Platform**- SMS replies delivered straight to your inbox or mobile handset.
- **Calendar Integration**- Schedule meetings and receive updates on the go.

- **Scheduling**- Pre-set SMS notifications and messages, and have them delivered even when you're offline.
- **Advanced Reporting**- Keep tabs on SMS spend with the option to set quotas, set up departments and define cost centers and generate usage reports.
- **SMS to Many**- Save time by setting designated groups.

Consider the costs involved in the following:

-Contacting delegates of an event to inform them of last minute changes.

-Informing customers of overdue payments.

-Sending last minute meeting requests to field staff.

Could you recover the time and dollar costs involved in these activities by utilising SMS?

About redcoal
